

Implementing IOGP 423 – HSE management guidelines for working together in a contract environment

Vision

All IOGP Member Companies use 423 guidance with minimum deviations, and in turn their contractors use it with their own contractors.

SAVING MILLIONS

- 1 instead of many different Company programs
- No need develop and maintain own Company materials
- Less staff needed
- Contractor can use materials (saving costs for contractors)
- Sharing cost to develop and maintain harmonized HSE information
- Shared costs to develop and maintain aligned training and training requirements
- Shared costs for joined campaigns

WORK MORE SAFELY

- Common language for all staff
- Workers hear the same things no matter where they work
- Less confusion more clarity and motivation
- Smaller Operators benefit from capability bigger operators

Sense of urgency

- In current business climate cooperation within our Industry is key
- Use (implementation) of Industry guidance is a must to Save Cost AND improve Safety
- Developing and maintaining own guidance is no longer sustainable

Accomplishments in Q3/Q4 2016

- Completed draft guidance and 3 supplements
- Draft presented to Safety Committee for review
- Integrated feedback from Review process
- Initiated implementation discussion
- Started stakeholder engagement – presentation to Global Benchmarking Group

Actions for the next Quarter

- Finish addressing detailed comments on supplements
- Circulate 423-00 for approval by chair of Safety Committee, followed by 3 supplements
- Draft implementation plan and Guidance
- Draft structure for interactive website where best practices, tools and documents can be easily reached and shared
- Prepare for London Face to Face Workshop (26 & 27 January 2017)
