Association  
of Oil & Gas  
Producers

# Geomatics Committee

## An Introduction

By **Richard Wylde, ExxonMobil**  
Past Geomatics Committee chair

Industry Day  
Aberdeen, April 2016

# IOGP - Standing Committees

The backbone of IOGP is a dynamic network of committees, subcommittees, task forces and work groups, each working in their own specialist area

 <b>Arctic</b> The world needs more oil and gas. The Arctic has the potential to provide it	 <b>Communications</b> IOGP needs a clear, consistent and compelling voice to foster understanding of the upstream industry's operations and objectives	 <b>Decommissioning</b> Addressing the challenges to be faced when offshore structures come to the end of their operational lives	 <b>Environment</b> Dedicated to identifying and spreading good environmental practice wherever the upstream industry operates
 <b>EU</b> Helping safeguard current and future production and ensure that Europe remains open to oil and gas imports from other producing areas	 <b>Geomatics</b> Dedicated to identifying and spreading good surveying, geodesy, cartography and coordinate data management practice	 <b>Health</b> Working to improve health standards and performance throughout the oil and gas sector	 <b>Legal</b> Dealing with questions of law and understanding how developments in regulations may impact operations
 <b>Metocean</b> Providing insights into applied oceanography and meteorology	 <b>Safety</b> Promoting the integration of safety into every aspect of daily operations	 <b>Security</b> Providing good security risk management guidance	 <b>Standards</b> Promoting consistent, efficient and effective upstream industry standards the world over
 <b>Subsea installation</b> Dedicated to improving the safety performance of subsea operations	 <b>Wells</b> Dedicated to improving the safety performance of wells throughout their full life-cycle		

# The Geomatics Committee – objectives and activities

## **Providing guidance**

Publish and maintain:-

- The OGP EPSG Geodetic Parameter Dataset – the de-facto global standard for CRS and geodetic parameters
- Surveying and positioning guidance notes and guidelines
- Industry standard position data exchange formats
- GIS data models
- Geodetic Integrity of Geoscience Software, test guidance and data

## **Liaison with industry standards organisations:-**

- IMCA, SEG, CAPP, Energistics, OGC, ISO

## **Forum for exchange of experience and knowledge:-**

- Biannual committee meetings
- Industry Days
- Active sub-committees and task forces
- Initialisation and support of industry JIPs

# Geomatics C. Subcommittees

- Geodesy
- Geo-Information
- Earth Observation
- Surveying & Positioning
- Geophysical Operations

# Current Geomatics C. Task Forces

## P-Format updates

- Well Bore Survey Data (P7)
- 3D Seismic Bin Grid (P6)

## Data Models

- Seabed Survey Data Model
- Land Survey Data Model

## GIGS

REPORT  
483-1 | APRIL  
2015

OGP P1/11 Geophysical position data exchange format

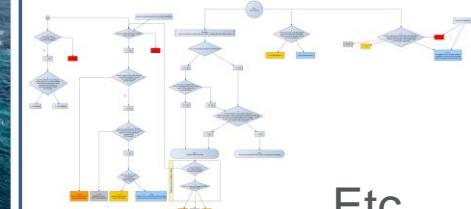

REPORT  
483-6 | JANUARY  
2016

OGP P6/11 Seismic bin grid data exchange format

REPORT  
483-2 | APRIL  
2015

OGP P2/11 Positioning data exchange format

Etc.

# 2015 Highlights

OGP/IPIECA OSR JIP published  
Recommended practice for Common  
Operating Picture (COP) architecture for  
oil spill response

Technical Notes published to accompany  
the very successful Guidelines for the  
conduct of offshore drilling hazard site  
surveys
