

# Fabrication Site Construction Safety Practices

©Heerema Fabrication Group

## Vision

- Develop and publish a set of common minimum oil & gas industry construction safety recommended practices and a set of enabling activities and a resource library to complement and support the implementation of these recommended practices

### The Recommended Practices (RPs), enabling activities, and resource library aim to:

- Improve performance – provide a reduction in workplace incidents
- Deliver consistency – a single approach to specific high hazard activities; consistency provides more time for site safety rather than reconciling approaches and learning requirements
- Improve experience transfer and learning across oil & gas projects and fabrication industry practices for contracted work carried out at fabrication sites

## Accomplishments since the previous newsletter

- Fabrication Site Construction Safety Recommended Practices has been approved by IOGP Safety Committee and IOGP Management Committee and issued as IOGP Publication no. 577, document is available at: <http://www.iogp.org/Reports/Type/577/id/2860>
- First draft of Phase II of Recommended Practices has been prepared for eight Enabling Activities Recommended Practices
- Submitted paper and presentation titled "Achieving Common Requirements for Improved Safety and Efficiency" for the 2017 Asia Pacific Health, Safety, Security, Environment and Social Responsibility (HSSE-SR) Conference, being held from 4-6 April 2017 in Kuala Lumpur, Malaysia
- Submitted abstract titled "Improving Fabrication Site Construction Safety with Industry Standardization" for 2017 SPE Annual Technical Conference and Exhibition, held from 9-11 October 2017 in San Antonio, USA

## Accomplishments in the next 30 days

- IOGP members, contractors and EPCM companies will be encouraged to initiate the adoption of Fabrication Site Construction Safety Recommended Practices
- First draft of Phase II of Recommended Practices for eight Enabling Activities Recommended Practices will be circulated for Task Force Member Company internal reviews
- Planning for the IOGP Task Force face-to-face meeting in London, April 18-20, will be finalized

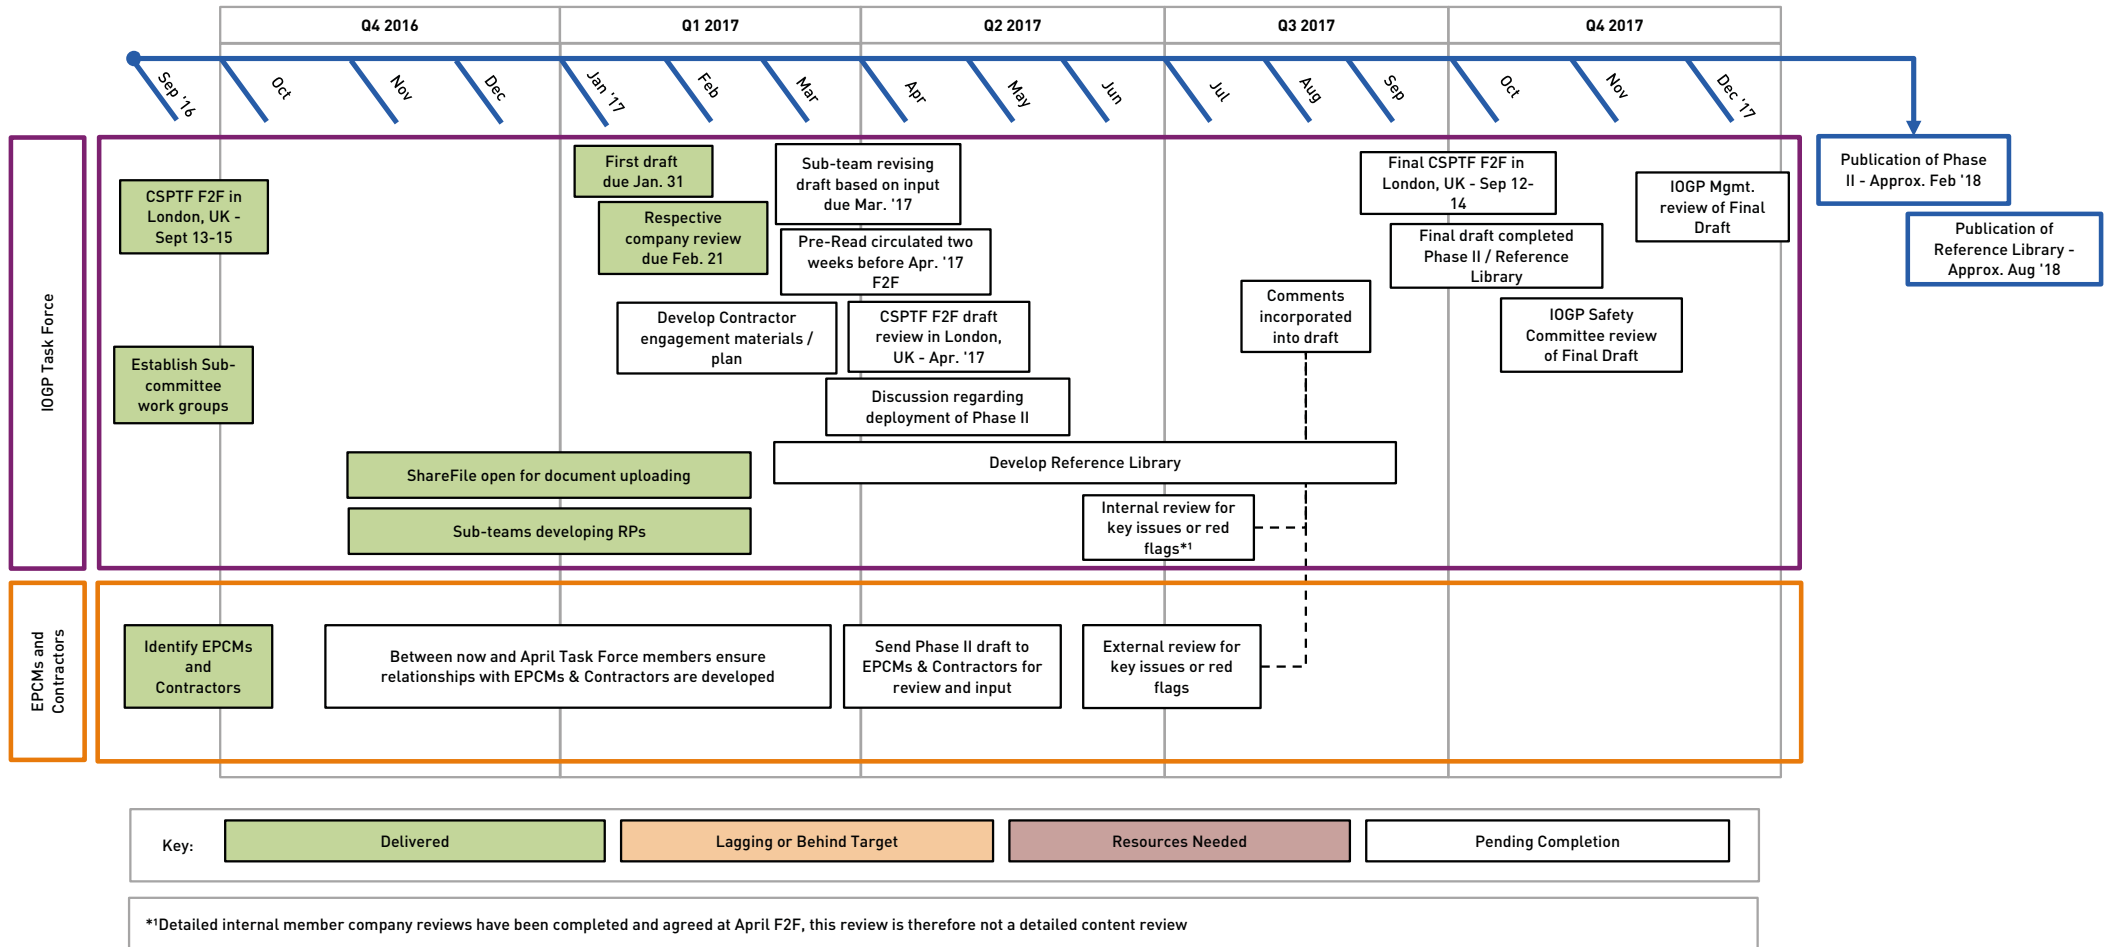

## Other Information

- All activities associated with this IOGP project are conducted in close alignment with the Korean Site Safety Standardization initiative currently underway
- Contractors and EPCMs selected for the sounding-board review were voted on by the Task Force based upon previous experience with fabrication sites, global geographic spread, etc.
- Current Task Force members: BP, Chevron, ExxonMobil, Kosmos Energy, Oil & Gas UK, Shell, Statoil, Total.

## Project Schedule Overview

## Schedule Needs/Concerns

- No current schedule concerns.
- Target publication dates for phase II to be agreed with IOGP.
