

# Production Indicator Map 2019

Arrows indicate 10 year trend

 Up
  Down
  Unchanged

The map above shows the division of the world into seven regions. The delineation of zones is not intended to reflect offshore boundaries.

## IOGP Production Indicator® (PI)

The IOGP Production Indicator® (PI) for oil is based on dividing daily production in thousands of barrels (or, for gas, billion cubic metres per year) by demand. The Production Indicator indicates the level of a region's self-sufficiency (and export potential). A Production Indicator above 100% demonstrates the ability to export; below 100% shows the need to import.
